Through the looking glass: Uncharted hero Nathan Drake relives 'Legend' Nathan Drake's adventures haven't ended with Uncharted 4, with the action hero reprising his role as the main character in video game, film and TV. The first footage from Rise of the Tomb Raider, the next instalment in the Tomb Raider franchise, was first shown in a reveal trailer at the E3 2015. Since then, the 50-minute action-packed trailer has reached more than 1.2 billion views on YouTube, and the game is due for release on November 10, 2017. As with the previous

video game and each previous film, the new Tomb Raider movie will tell a story about how Lara Croft first became the Tomb Raider, and then Lara's survival as she gets caught up in a war between two factions vying for control of the island. As well as playing a starring role in the next Tomb Raider video game, Uncharted hero Nathan Drake has been brought back into the mix. The first episode of Uncharted movie trilogy, Uncharted: The Lost Legacy, has been released, and the next instalment, Uncharted: The Thief's End, is due to be released on 26 June 2017. The third movie, a co-production with director Neill Blomkamp, is due to be released on 12 October 2017. The film is in post-production and featured exclusively at the South by Southwest film festival in Austin, Texas. This was the first occasion the trailers were released on a social network such as Twitter or Facebook, with the 10th episode of the Uncharted movie 'Uncharted: A Thief's End' being released on Twitter a few days before the trailer was launched. The film was released on DVD on 23 April 2017. 3 Days to bc9d6d6daa

Q: Dijkstra's algorithm with iteration I have made a program in c++ of the Dijkstra's algorithm, and I want the shortest path to be printed if a certain condition is met. I want to use the scanf function to input the number that is the condition, and use that number to iterate the whole algorithm, and when it is the shortest distance I want to print it. My code doesn't show the shortest path, however,

```
int main(){ int n, m; double sum, mva; int capacity, v[MAXV];  
// capacity & avisos cout >n) { capacity = 100; v[0] = 1; v[1] = 2; v[2] = 3;  
v[3] = 4; v[4] = 5; v[5] = 6;
```

FIFA is more than a game: it is the world's leading soccer simulation game franchise. FIFA is a video game series of international soccer (football) video games, published by Electronic Arts. The series began with FIFA Soccer 95, released in September 1995 by Virgin Interactive (as EA Sports). It was

the first game in the series, and the first to be published by EA Sports. In FIFA, players control one of 32 national teams from all the world's FIFA member associations. The objective of FIFA is to score a given number of goals as your team, while controlling all aspects of soccer (football), from managing your players' fitness and ability, to substituting and playing controlled player substitutions (unlike the live game of soccer). A number of licensed leagues are also featured, which allows the player to experience the true speed and excitement of the real game by choosing to play against the teams in their own local league. The game features single-player, local multiplayer, online play and a career mode (the latter two of which are not part of the core series). The FIFA series is noted for its high-quality, 3D graphics. For PlayStation 2, FIFA, FIFA International Soccer, and FIFA Street have been published on the Sony PlayStation 2 computer entertainment system. EA Sports has also released the games on Nintendo's GameCube, the Microsoft Xbox, and the Nintendo 64. The series has also spawned a number of spin-offs, including FIFA 09: Road to FIFA 09, and FIFA 11: Road to FIFA 11. FIFA is notable for its multitude of awards and achievements. Most major awards are based on a public poll of users from each of the member associations, which determine the top players. The top honors in the series to date include the FIFA World Player of the Year, and the Golden Ball as Europe's best player. EA Sports also has its own annual awards show in which players and the teams are recognized for their year's efforts. The player can choose from 8 million player licenses, 1 million player cards, and up to 10 million kits. FIFA is also one of the most addictive games ever made. When any of the players in

your team is in possession of the ball, they have a number of options on what to do with the ball, and the amount of control of the movement/direction of the ball, and that is what makes the game so addictive. When the time comes to make that decision,
