Cool, imho, you can't see all movies you want (and every movie you want is in HD for free anyway - it's free to download them anyway), so what's the point? When I Google for "watch online movies online free," the top hit is FastDownload. It has a 7-day free trial, so I'm going to give it a try (I'm not going to invest any time or money on a free

trial, so it's just a free, 7-day trial). pul>
Dear Sir/Madam, I need a video player which can play unlimited number of mp4, 3gp, mkv formats in HD, off which I can download all the files and play them offline anywhere anytime of the day. But, I will not be able to download any streaming web player, as I do not want to pay any extra for downloading any kind of streaming media player. I want a free video player (that is internet video player) that will play unlimited number of formats. Any suggestions and please let me know if you have any suggestions to help me in this matter. Regards, "Anurag bhatti".

PuLi Full Movies Hd 720p. pdfQ: How to replace a string in a text-file by another string with PHP? What I have: A list of phone-numbers. What I need: A list of phone-numbers. What I tried: \$string = file_get_contents('phone-numbers.txt');

```
$string = str_replace($string, "", " ");  
file_put_contents('phone-numbers.txt',  
$string);
```

Is there a better way to do this? A: You could use something like this to replace the space with anything except new line:

```
$string = str_replace(" ", " ");
```

And then do the same to replace it back:

```
$string = str_replace(" ", " ");
```

A: There are several problems with what you're doing. 1 - `file_get_contents` returns a string, the result of the file search. That's why the `$string` var contains a string. 2 - `str_replace` expects its first argument to be a variable, not a string. 3 - You don't see errors, which you should. Try displaying `$string`, you should get the contents
