The Burn Tool is used for creating a selective black or white overlay to your image. This can be useful for correcting blemishes or fading. The Pen Tool allows you to create basic line art, shapes, paths, or text. The Gradient Tool allows you to apply colours, shades, or textures to images. The Shadow or Dodge & Burn Tools allow you to lighten or darken certain areas of an image. The Sponge Tool is perfect for giving surfaces a new texture and colour, including adding stains and smudges to the image. The Healing Brush is great for removing minor blemishes and damage to an image. The Content-Aware Fill Tool is a good alternative to the Healing Brush if you want to fill a large area of your image with a new colour, shape, or gradient. The Eraser Tool allows you to remove unwanted pixels, line art, shapes, or text from an image. The Channels are a way to display different colours of the same image in a single image. The Channels window displays the colour channels of the currently selected layer. Once you have created a new image, you will need to separate it from any other layers or tools it contains. To do this, click on the thumbnail of the layer in the Layers Palette. You will now see a sub-palette to the right of the main layers palette. The sub-palette contains all the tools that can be used on the active layer, and the Tools palette. The tools that are included in the Photoshop Tools palette (also known as the Plug-in Palette) are just the essentials. These are the tools that you will find used the most when editing images in Photoshop. Inside the Photoshop Edit toolbar, the top row of tools contains the following: The Crop Tool changes the size and

positioning of the image. You will be able to crop the image in the Layers Palette. There are no cropping tools for horizontal or vertical image cropping, only for cropping the image in 8 equal increments. The Resize Tool changes the size of the image. You can resize the image in either 8 or 16 equal increments. The Type Tool is used for creating basic text objects and paths. The text can be styled using different fonts and sizes and includes the ability to make text into shapes and follow the path of a brush tool.
