Oryzomys microcephalus Oryzomys microcephalus, also known as the extremely small rice rat, is a species of rodent in the genus Oryzomys from Colombia. The specific name microcephalus comes from the Latin prefix meaning "small" and the suffix -cephalous meaning "having a head", thus referring to the small head size of this species. Description Oryzomys microcephalus is a small, grayish-brown rodent with a broad head and a large, transversely flattened and heart-shaped torso. The head is smaller than the rest of the body and it is longer and more slender than the body. The dorsal hairs are almost always present, but the ventral ones are more variable. The hair of the body is sparse, and the pelage of the tail is long and covered with very fine hairs. The species does not grow to a great size, with a total length of. Females tend to be larger than males. The head-body length averages, and the tail averaging. The head-body length averages for males and for females. The tail averages for males and for females. The weight ranges from, averaging about. Range The species has a disjunct distribution in Colombia. Habitat and ecology The species' range is disjunct. The type locality is Valle del Cauca, municipality of Popayán. The taxon O. coerinius is found to the east and O. cunctatus to the west. The western distribution extends west to Vélez and east to La Peña. Oryzomys microcephalus inhabits the middle and upper portions of the Cauca river in Valle del Cauca, as well as the lowlands of Ecuador, northern Peru, northern Colombia, and southern Venezuela. It occurs in the intermountain region from elevation. In 648931e174
