With the emergence of affordable digital cameras, many people are shooting RAW images, or using high-quality RAW conversion tools. In this new era of digital photography, Photoshop is no longer the only image-editing application. Photoshop acts as the gateway to many different image-editing programs. You can use Photoshop to edit JPEG images (which may include anything from simple touch-ups to more elaborate HDR processes), but it is not suited for the editing of RAW images. Instead, you need a stand-alone RAW converter. In this book, I show you how to use Photoshop to make simple and effective adjustments to your photos and also how to use Photoshop's more creative tools to give your images a unique new look. In this chapter, you learn how to use the blending mode and crop techniques to get the best look from your photos and also how to use the Smart Objects and Smart Filters to create stunning composites. Use any photo-editing tutorial to get up to speed with Photoshop. Visit www.photoshoppessentials.com to download additional tutorials in PDF format. You can also find additional Photoshop projects and website additions at the portions of the links provided throughout this chapter, and the entire chapter available at [Making Image Adjustments Adjusting Images in Photoshop is the easiest way to improve a photo's overall look and feel. You can use most of Photoshop's tools and work with layers, just as you would with a photographic negative — or any piece of film. This approach is so much simpler that you don't realize how much easier and easier Photoshop makes photo-editing. Editing images involves a lot of subtle image adjustments that you can make relatively quickly. In fact, you may be amazed at how much you can get done in just a few minutes. You can make simple adjustments for the look you want to achieve. For example, you can improve the contrast in an image to make shadows look stronger or highlight the main subject in a photo. You can use the spot healing filter to easily remove blemishes and other unwanted spots from a photo. You can even make relatively complicated image adjustments with the exposure tool that emulate the look you want to achieve in your photo. Procedures for image editing To make your image adjustments, follow these easy steps: 1. Choose Image⇒Adjustments⇒Levels \(Windows\) or Edit](#)

The new options for KiwiSaver members are the result of a number of extensions to the fund's rules and governance in the past five years. The most significant change is the shift from a lifetime benefit to a "use it or lose it" proposal, by which a member's contributions will reduce to only about 25 per cent of their value after 35 years of contributions. To maintain their retirement benefits, members will need to make new contributions equal to the amount by which their previous contributions were insufficient to hit the earnings cap in the fund. Those who haven't hit the earnings cap by their 53rd birthday will receive at least the full amount they would have if they had not missed the deadline. The fund will be able to provide additional financial returns to cover the shortfall, but all members will still receive their full retirement benefit if the shortfall exceeds the additional returns. The lifetime benefit option is an extension of the original proposal, which would have reduced the retirement benefit for anyone who didn't contribute enough during their working life. The maximum limit of 7.2 per cent net earnings, the equivalent of an 8 per cent after-tax salary, is unchanged. Contributions to the fund are taxed at 17.5 per cent, though the government will waive this for members under the age of 18. The extension of the earnings cap is the main change to the original rule-change proposal. The earnings cap would be the same as it is for working adults. A member who doesn't contribute enough throughout their working life will not receive a retirement benefit, but their savings will be protected and there will be no taxes on them. However, the earnings cap would increase to \$190,000 at retirement. The original proposal to extend the earnings cap would have applied to a member's savings from their age 18. If a member doesn't reach that limit in their working life, they would forfeit their savings. The results of the four tests were announced at an Auckland fund management conference on Friday. The fund has gained back almost one-third of the value of its portfolio since it was put into trusteeship in September last year. The portfolio has risen more than \$4 billion to \$245.4 billion

Toy:Keeper :: What to Know Before Buying a Kitten from a Pet Store Is it really worth the pet-store kitty? Feline friends. When talking to people about your cat, you always hear how important the human-feline relationship is and how much it means to them. However, before you put down the debit card, it might be worth asking yourself "Do I really want a cat?" Because for a lot of people, getting a cat means spending extra money and investing lots of time. So what if you don't want a cat at all? Are pets really that important? Pets can be really great, but they can also be a pain in the butt. It's easy to buy some pretty inexpensive, cute accessories at a pet store, but you may be surprised by just how expensive the real deal can be. They also require a lot of maintenance and a lot of time. What if you don't have that time? So do you still want a pet? Do you want to get a cat? If you are looking for a feline companion, here are some things to consider before you spend a lot of time and money: You may not be able to hold a cat First off, your cat is big, so your arms aren't going to be able to hold it. Think about all the times you have tried to hold a baby and ended up trying to balance your baby on your head for a photo. Or when your daughter is standing on the counter and you had to hold her high up to get her to be still. Well, that's exactly what it's like for you to hold your cat! My cat, Silas, is just under 20 pounds, and he's taller than you! Also, remember that you'll need to have someone to help you with your cat. I'm not saying you can't get a pet without having help, but it will be much more difficult. And the last thing you want to do is put your cat in a situation where they will have to fight for their survival. Cats are expensive. There are a lot of things that make a cat expensive. The first is food. Your cat is going to eat twice or even three times a day. Every time you go to the store to buy them cat food, you are going to pay at
