Why You Should Edit Photos Our innate desire to preserve and share moments with friends and family motivates the editing of images. Many of us want to contribute to these special memories, both because we want to preserve these memories for the future and because we want to enjoy them in the present. Whatever your reason, you are likely to end up editing your photos. Pro photographer Joel Grimes says, "Art is about bringing the right things together on the page. This means first the photographer, then the editor. Your goal is to make the right picture, and then the right picture requires knowing the right things." Add to that the fact that most of us have smartphones that allow us to capture those special moments, and there's no reason not to enjoy the work. Photography Edit Tasks While a great deal of photo editing is simply about adjusting or retouching images, the process can also be as much about fine tuning to make the most perfect, high-quality photo possible. There are a couple of things to consider when editing photos. Below, we'll look at 10 tips and tricks to help ensure that your photos are the very best, and that you'll get the most out of your edited images.

1. The Importance of the White Balance The white balance is the dominant color in an image. This is the color temperature of the surrounding light or the light source, such as tungsten or fluorescent lighting. One of the most common settings for white balance adjustment is Auto, which uses the camera's white balance setting. But, you may be able to use other settings such as Fluorescent or Direct sunlight. The most common setting for photo editing is to use an Auto, which takes a guess at the white balance. The Auto setting works great for a wide range of lighting. But if you notice, a photo may be too blue when taken under fluorescent or tungsten lighting, or too yellowish when taken under direct sunlight. If your camera doesn't have the Auto white balance setting, you can manually change it to another white balance setting, such as Fluorescent or Direct sunlight.
2. Balance Black and White This is often the most common problem photographers see. When we edit photos, we tend to either adjust the color or we try to remove color. And as the color is removed, the shades of gray are no longer balanced. This is where

Rooms Rates Cost Located Near Not There Reviews Good old Cables are back in business - 27 September 2016 We are back in the area and need a hotel to take our kids for a stay in October. This is a great hotel - large room, pool, spa etc. We have stayed here before and love it. However, if there is a markdown on the week we stay we have to look at it. \$20 per day for the second night is not worth the two hour drive each way for a family of three. \$10 is. The On the road - 14 April 2016 The hotel has a great location. But none of the rooms were that much to be excited about. When we got into our room the floor was filthy, there was holes in the ceiling and the room was a bit dated. I wouldn't stay here again. Is this your first time at Travelodge Liverpool Southport? YesNo Thank you for your feedback. Our team are looking into your recent stay at Travelodge Liverpool Southport. If you would like to report a problem, then please contact our team to help.
