Roblox is an online game platform where users can create their own games and play the games created by other players. It is a game creation platform developed by US-based software company Roblox Corporation, which was founded by David Baszucki and Erik Cassel in 2004. Roblox was officially released on January 26, 2006 and is a free online game platform, where users can create and play games using technology that runs on the Roblox game engine. However, the emergence of the COVID-19 pandemic has forced Roblox to suspend all game development and player gameplay, and Roblox has announced that it would use funds for user safety and will prioritize support for both the development and the COVID-19 response team. Roblox has also claimed that users are not in any danger, as their game servers and data are fully backed up and its games are under strict moderation by human moderators. However, concern remains as there is currently no evidence that Roblox is addressing safety issues or facilitating the return of gameplay.
